# PRINTING INSTRUCTIONS:

*Before printing, make sure the document is set to print at 100% scale, and create a custom page range to select only the pages you're interested in printing.. If possible, print onto thick/luxe/cardstock paper (regular printer paper is fine, too; you can always "back" it onto thicker paper once it's printed by trimming both sheets to size and using a glue stick or double-stick tape to mount them together).*

*If you need to cut or trim the worksheets to size, I recommend using a paper cutter (rather than scissors) to do so.*
