## **PRINTING INSTRUCTIONS:**

Before printing, make sure the document is set to print at 100% scale—if the font appears too small or too large, you can always adjust this scale—and create a custom page range toselect only the pages you're interested in printing.

Print as many copies as needed (there are 4 worksheets included in each print).

If possible, print onto thick/cardstock paper (regular printer paper is fine, too; you can always "back" it onto thicker paper once it's printed by trimming both sheets to size and using a glue stick or double-stick tape to mount them together).

If you need to cut or trim the worksheets to size, I recommend using a paper cutter (rather than scissors) to do so.
